Why is drone training right for you?

Either you just purchased a drone or you're looking to further your education and seeking training from highly experienced instructors.

How were these curriculums formed?

The knowledge in these courses were from actual field experience from a seasoned professional drone and airplane pilot.

Will we gather flight experience?

Yes, some of our programs are hands on training giving you the experience to comfortably fly your own missions and the education to apply out in the field. From the whiteboard to stick flying to automation.

What makes UPD different from other sUAS drone training facilities?

Our training programs are derived from years of commercial sUAS and airplane pilot experience of aerial mapping and thermal imaging from a successful certified sUAS thermographer and international Drone pilot with over 60 safe power plant inspections and miles of powerline flying.
